Natalia's Clip Sales Calculation

Step 1: Identify Given Information

- **Hourly Rate:** $12 per hour.
- **Time Worked:** 50 minutes.

Step 2: Identify the Question

- The problem asks for Weng's **total earnings** for that specific 50-minute session.

Step 3: Identify Mathematical Operations

1. **Unit Conversion:** Since the rate is hourly but the time is in minutes, we need to convert minutes into hours (division by 60).
2. **Multiplication:** Multiply the time (in hours) by the hourly rate to find the total pay.

Step 4 & 5: Set Up and Perform Calculations

Method A: Fractional Hour Calculation

- Convert minutes to hours:

Gemini

Natalia's Clip Sales Calculation

Method A: Fractional Hour Calculation

- Convert minutes to hours:

$$\frac{50 \text{ minutes}}{60 \text{ minutes per hour}} = \frac{5}{6} \text{ hours}$$

- Calculate earnings:

$$\$12 \times \frac{5}{6} = (\$12 \div 6) \times 5 = \$2 \times 5 = \$10$$

Method B: Pay-Per-Minute Calculation

- Find the rate per minute:

$$\$12 \div 60 \text{ minutes} = \$0.20 \text{ per minute}$$

- Calculate earnings:

Natalia's Clip Sales Calculation
Step 1: Identify Given Information
Blue fiber required: 2 bolts.
White fiber required: Half the amount of the blue fiber.
Step 2: Identify the Question
The problem asks for the total number of bolts (blue and white combined) needed to make the robe.
Step 3: Identify Mathematical Operations
1. Division: To find the amount of white fiber (half of 2).
2. Addition: To combine the amounts of blue and white fiber for the total.
Step 4 & 5: Set Up and Perform Calculations
Find the amount of white fiber:
2 bolts ÷ 2 = 1 bolt

Eggs eaten per week: 3 eggs/day × 7 days = 21 eggs
Total eggs in 4 weeks: 21 eggs × 4 weeks = 84 eggs
Convert to dozens: 84 / 12 = 7 dozens
Answer: 7 dozens

3. Division: To convert the total number of eggs into dozens (Total ÷ 12).
Step 4 & 5: Set Up and Perform Calculations
Find eggs consumed per week:
3 eggs/day × 7 days/week = 21 eggs/week
Find total eggs consumed in 4 weeks:
21 eggs/week × 4 weeks = 84 eggs
Convert total eggs to dozens:
84 eggs ÷ 12 eggs/dozen = 7 dozens
Step 6: Final Answer
Claire will eat 7 dozens of eggs in 4 weeks.
